four ideas

- **Ten-X Interview Tool. (web app)**
  Build a web app to manage candidates, questions, feedback, and interviewers to help our company grow massively in 2017

- **Ten-X (chat bot)**
  Build a chat bot that leverages our API to have meaningful conversations with customers and internal users [via slack, fb messenger, SMS, etc]

- **NooGames - next (game)**
  We are looking for the next simple online game to plug into our real-time multiplayer turn-based game system. Possibilities are Backgammon, Airplane Chess, or maybe a suggestion from you?

- **Lunisolar (visualization)**
  a calendar showing a solar year with lunar (and other) holidays atop it. Press play and see how the holidays move through time.

NooGames : Next Game

- we need a new game to place alongside Princes of California

- web app; JS, Node, React or Angular

- Chess or Backgammon are our choices but we're open to hearing about others.

- TDGammon already exists for an AI so we could leverage that AI

- it would plug into our existing multiplayer challenge, ranking, and tracking infrastructure

Lunisolar

When is Ramadan this year?

When is Chinese New Year and what animal is it?
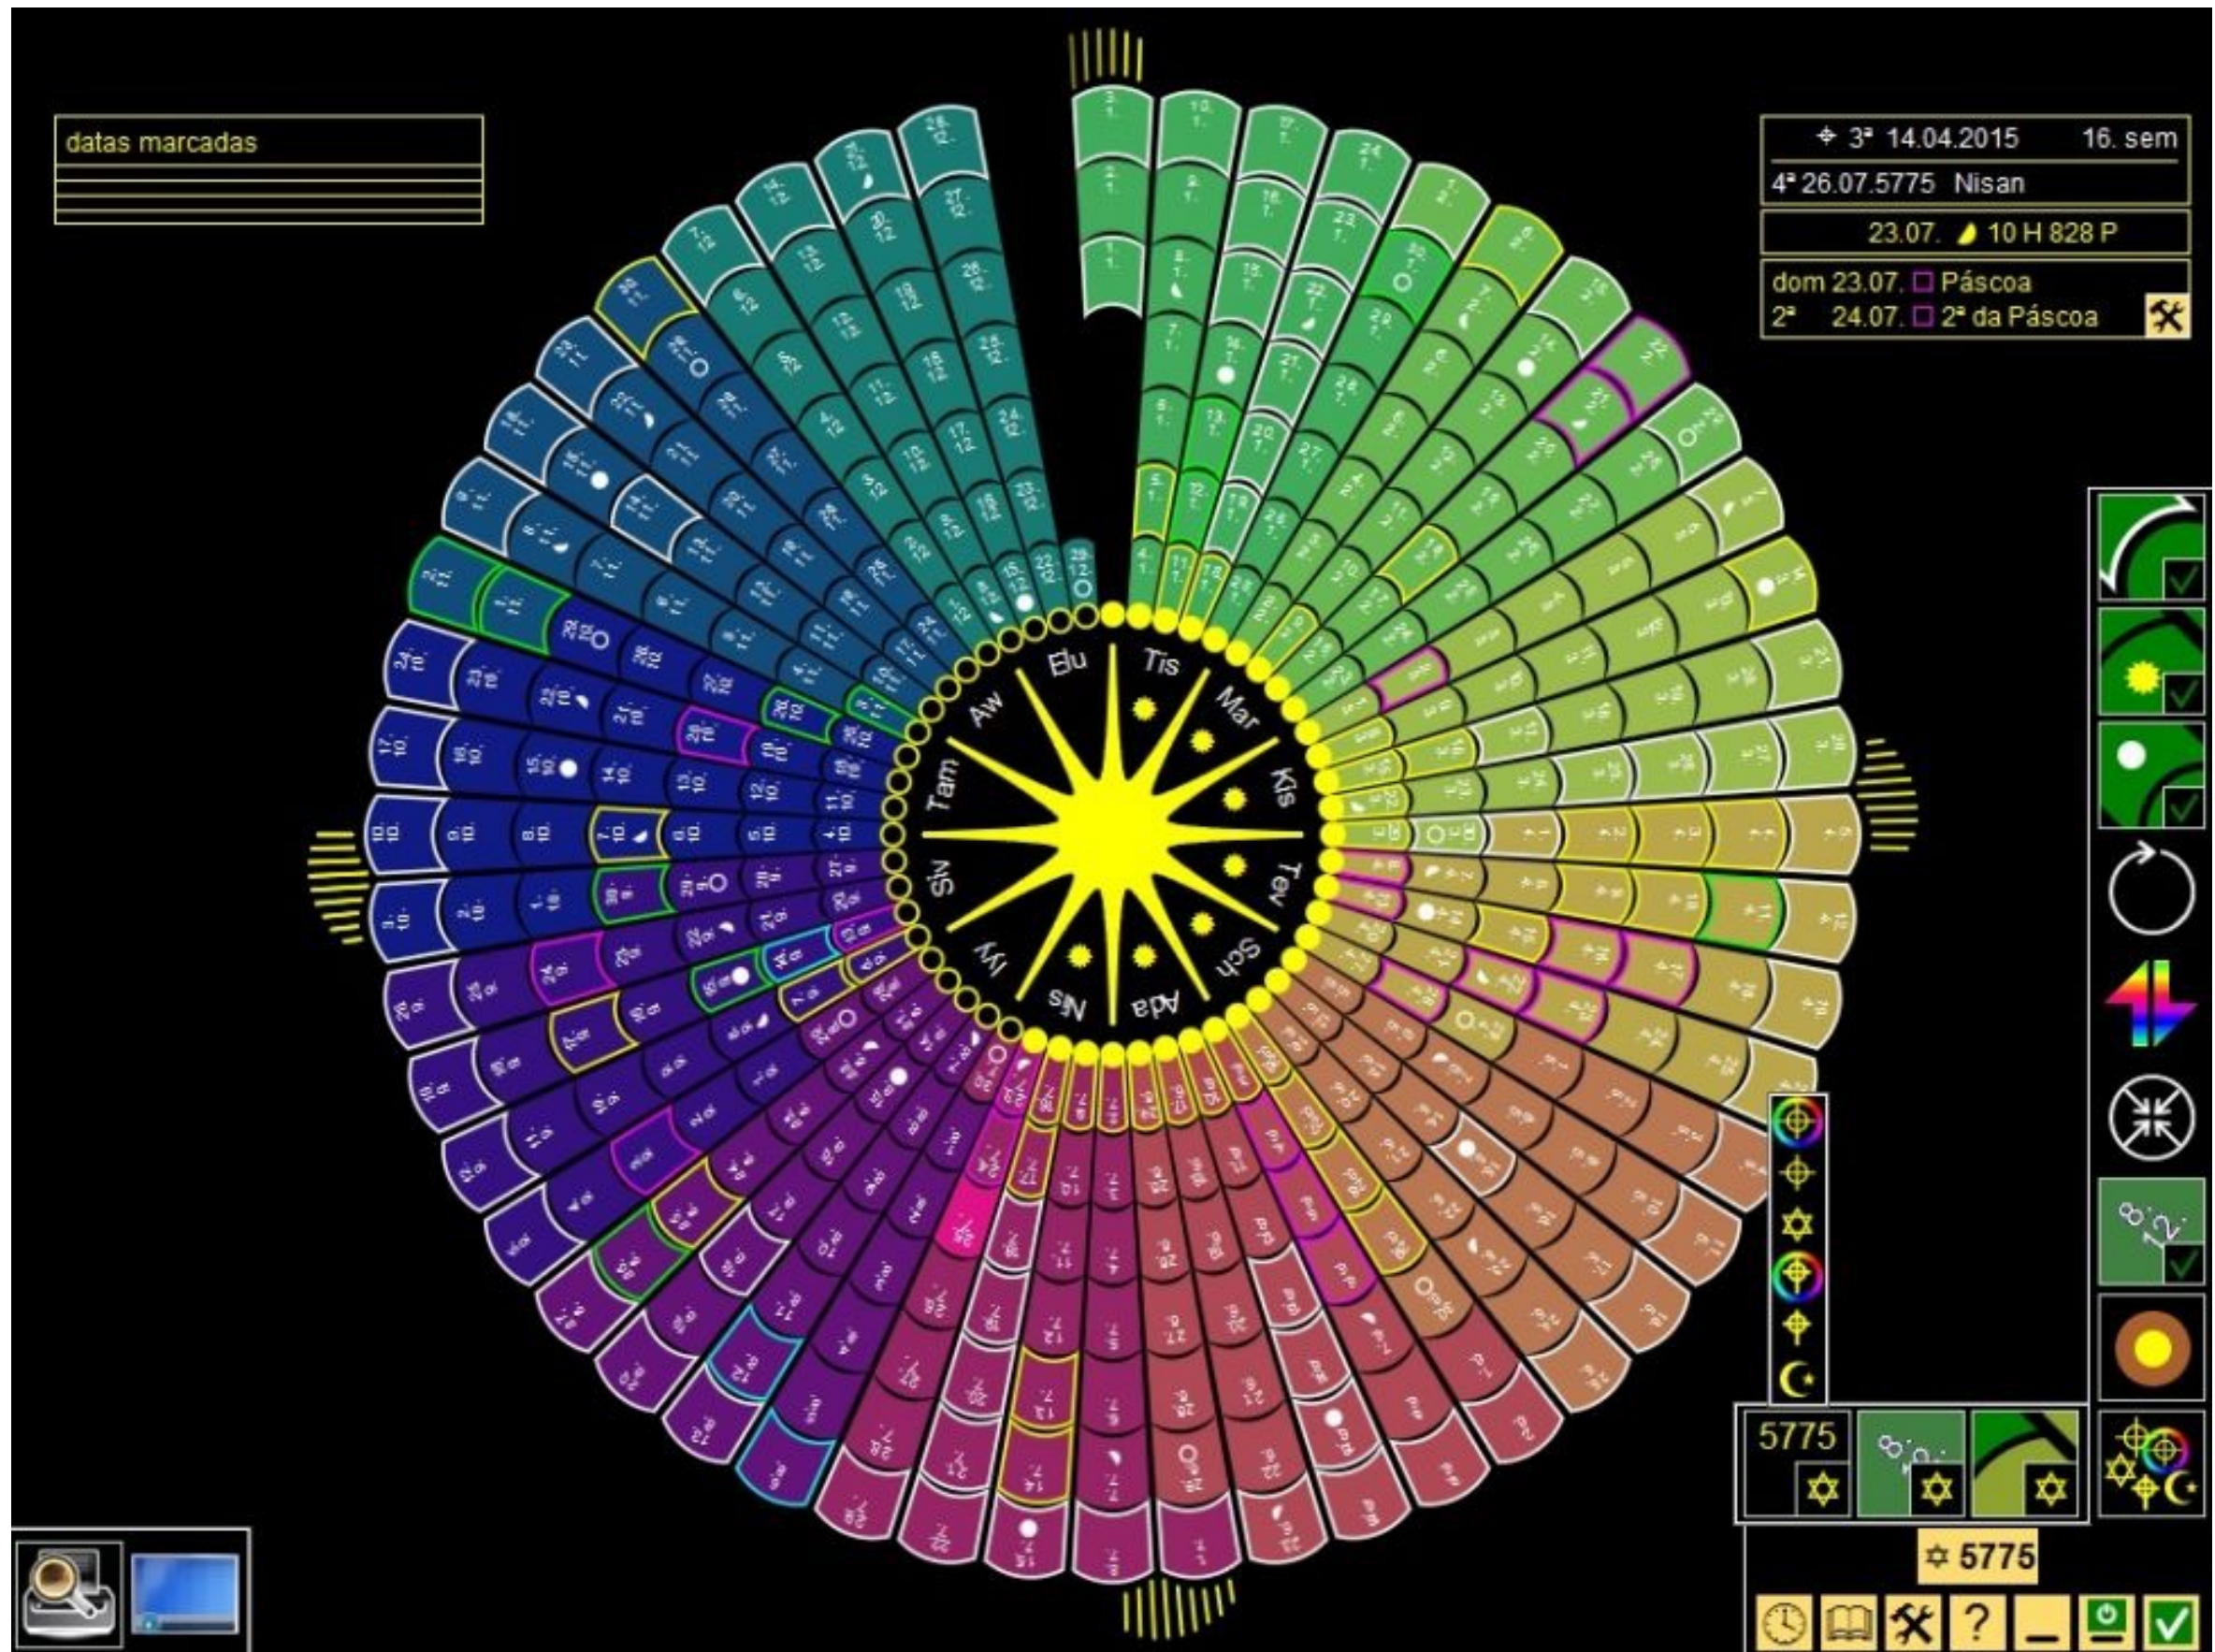

When is Rosh Hashanah?

Full moon schedule

What is the best day to schedule a meeting between my US team and my Indian team to guarantee no holidays?

When is Diwali?

When is Easter?
